

SEND Information Report

Caring for every child as an individual at Kid Co means recognising that each child is unique, with their own personality, interests, abilities, cultural background, family structure and pace of development.

At Kid Co we support each child and whether your child has long term needs or just requires a little additional help through stages of their development we will offer guidance, reassurance and resources to help them fulfil their potential.

Our experienced staff led by our dedicated SENCO team will build strong secure relationships with your child through observing and listening to them which allows us to plan experiences that are meaningful and engaging for them.

We value strong partnerships with parents and carers, sharing information to support each child's learning and development both at nursery and at home.

We work closely with external professionals which may include speech & language therapists, occupational therapists, physiotherapists, specialist teachers, portage services and early help teams to create strategies that will help your child thrive.
